

TERRANE

GEOSCIENCE INC.

Precision Soil Testing for Smarter Solutions

At Terrane Geoscience Inc., we provide high-quality soil testing services to support engineering, construction, and mining projects. Our state-of-the-art laboratory delivers accurate and reliable results, ensuring you have the data needed to build with confidence.

OUR SERVICES

Gradation Analysis

- Sieve Analysis
- Hydrometer Analysis

Atterberg Limit Testing

- Liquid Limit (LL)
- Plastic Limit (PL)
- Plasticity Index (PI)

Moisture Testing

- Moisture Content

Accurate & Reliable Results – We use industry-leading equipment and methodologies to ensure precision and maintain CCIL Certification

Fast Turnaround Times – We understand the importance of timely data for your projects

Experienced Geotechnical Experts – Our team brings years of expertise in soil mechanics and geotechnical engineering

Custom Testing Solutions – We tailor our services to meet your unique project needs

INDUSTRIES WE SERVE

Civil Engineering
& Construction

Environmental &
Land Development

Mining & Resource
Exploration

Infrastructure &
Transportation

PRICING

TEST	TEST STANDARD	UNIT RATE
Sieve Analysis of Fine and Coarse Aggregates	ASTM C117, C136	\$140
Gradation of Fine-Grained Soils Using Hydrometer Analysis	ASTM D7928	\$275
Liquid Limit, Plastic Limit, and Plasticity Index for Soils	ASTM D4318	\$200
Moisture Content of Soil and Rock	ASTM D2216	\$20
